

THERMALWELD[®] SELECT

polariswindows.com

DOUBLE HUNG FEATURES

Sash limit locks secure partial opening.

Continuous over/under interlock and sashes are triple weatherstripped to prevent air infiltration. Optional reinforced meeting rails.

Extruded lift rail is part of sash extrusion, not added later. Fusion welded frame and sash corners are strong and free from gaps.

polariswindows.com

Premium Double Hung featuring Duo-Tilt Lock

Standard on ThermalWeld Select

Duo-Tilt combination lock system allows three sash lock actions: Lock, Unlock and Tilt. Lock system provides a hidden tilt latch function.

Duo-Tilt lock system provides a secure, air tight seal. DuoTilt locks eliminate need for added tilt latches, giving a more stylish look and a stronger corner weld on meeting rail sash.

PICTURE WINDOW

Picture windows, although inoperable, provide additional light and depth to a living space. Flank double hungs or casements to create a more unique design to a room. Picture windows are also the main focal point in Bay windows.

WINDOW FEATURES Standard on ThermalWeld Select

FOAM FILL INSULATED EXTRUSIONS

Multi chamber extrusions are strong and insulating. Foam-filled main frame and sash optional.

INNERGY
Rigid Thermal Reinforcements

OPTION

Rigid Thermal Reinforcements are advanced fiberglass reinforced resin inserts, designed to slide easily into window chambers for greater support and insulation.

Intercept Stainless
The Strongest Choice.™

Sealant Effectiveness & Gas Retention
The sealant provides the moisture vapor barrier for the I.G. unit. The longer the transmission path, the slower the rate that moisture will travel into the unit through the seal. Stainless Steel is impervious to gas transmission, improving gas retention and maximizing the insulation value of your window over time. Intercept® Stainless offers one of the best transmission paths to maximize window performance.
